

IsHaunted — The site administrator

Runs the platform itself. Passes every permission check, everywhere. Written for a developer joining the project.

Every screenshot shows simulated, seeded data, captured in dark mode while signed in as this user type. Nothing here is a real person, case or investigation. Where a page shows a refusal, that is the designed behavior for this seat.

The SuperAdmin operates the site rather than using it: people, groups, taxonomies, billing, moderation, and the diagnostics that say whether the platform is healthy.

Two of these screens exist because something went wrong and could not be seen. **Outgoing Mail** exists because a real sign-up produced no email and nothing anywhere recorded it — a failure that is invisible from every other surface, since the account exists and the site is up. **Rate limits** and the **audit log** are the same idea: the platform explaining itself rather than requiring somebody to read the database.

How this site decides what you may see

Two things gate every surface, and they are different questions:

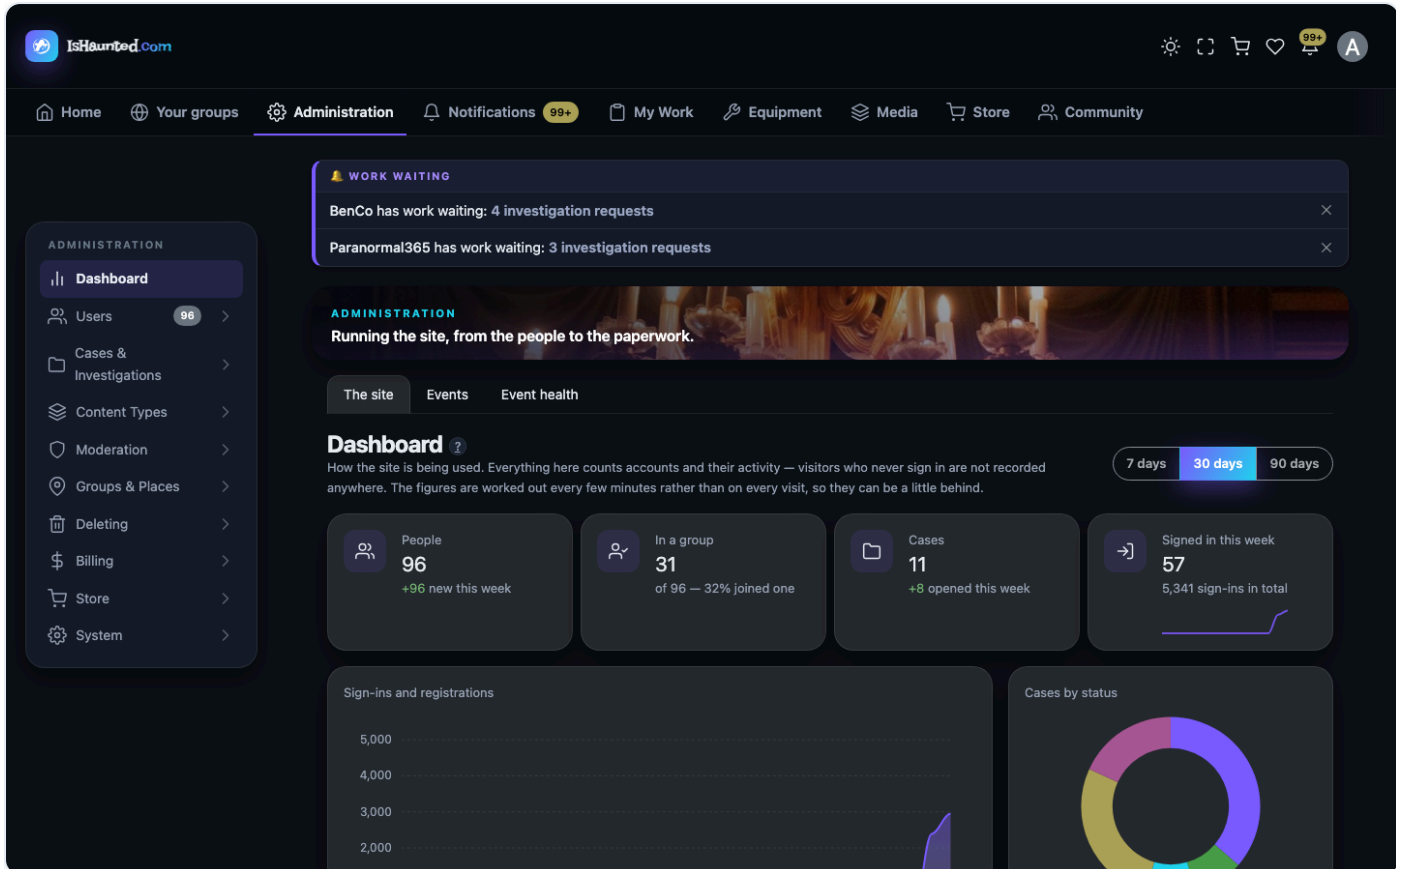

Your seat in a group — owner, administrator, member, viewer — answers "may this person do this?". **The group's plan** answers "does this group pay for this at all?". A member of a group whose plan excludes an area is refused for a completely different reason than a viewer who is not allowed to write, and the site says which.

A refusal is never rendered as "nothing here." An empty list and a server saying no are different facts, and a page that shows the same gray nothing for both teaches people to distrust it. Every list goes through `LoadResult`, which carries loading, empty, refused, session-ended and rate-limited as distinct states — and every one of them has its own words on screen.

This matters when reading this document: where a screenshot shows a refusal, that *is* the designed behavior for this seat, not a broken page.

Rate Limits

What the site's rate limits have turned away. You are told once per limit, by message; the totals here are where to look after that. Counts are written about once a minute, so the newest few refusals may not be included yet.

Limit	Refused	Addresses	Allowed / min	Reading	Last seen	Actions
general requests	5	1	20,000	One caller	10/02/2026 10:35 AM since 10/01/2026	Notice armed
store-checkout				Usually a script or a stuck client. The limit is doing its job.		

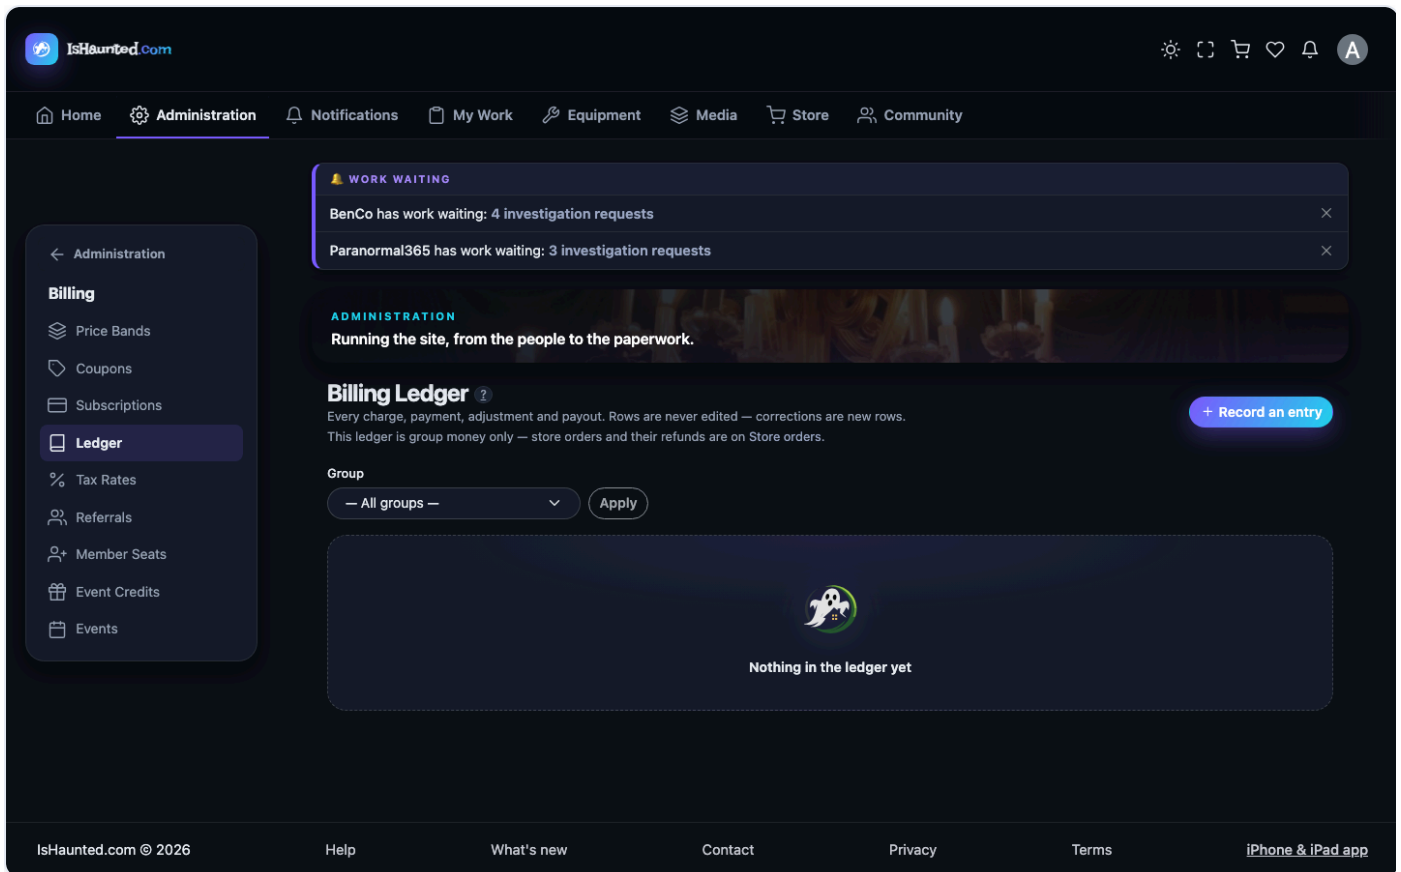

Limits themselves are changed on the Site Settings page. A change takes effect within a minute and needs no restart.

Upheld

Removed 09/13/2026 by AverageBen, when it was a draft. No credit to return.

Note at removal: "Listed a trespass at a closed hospital as a public ghost hunt."

This is a sanctioned night at the Old Mill with the owner's written permission. We've renamed it and added the letter to the event's files.

AverageBen, 09/13/2026

AverageBen answered: "Thanks for the letter from the owner. It's back as a draft."

Draft

What removing it does

- It comes off the site and can't take bookings. Nothing is deleted.
- Nobody has a place or has asked for one, so no guest is written to.
- No event credit was spent on it, so there is none to return.
- The organizer is emailed that it doesn't meet our guidelines for hosted events, with a link to appeal. An upheld appeal brings it back as a draft.

Note for the record (never sent to anyone)

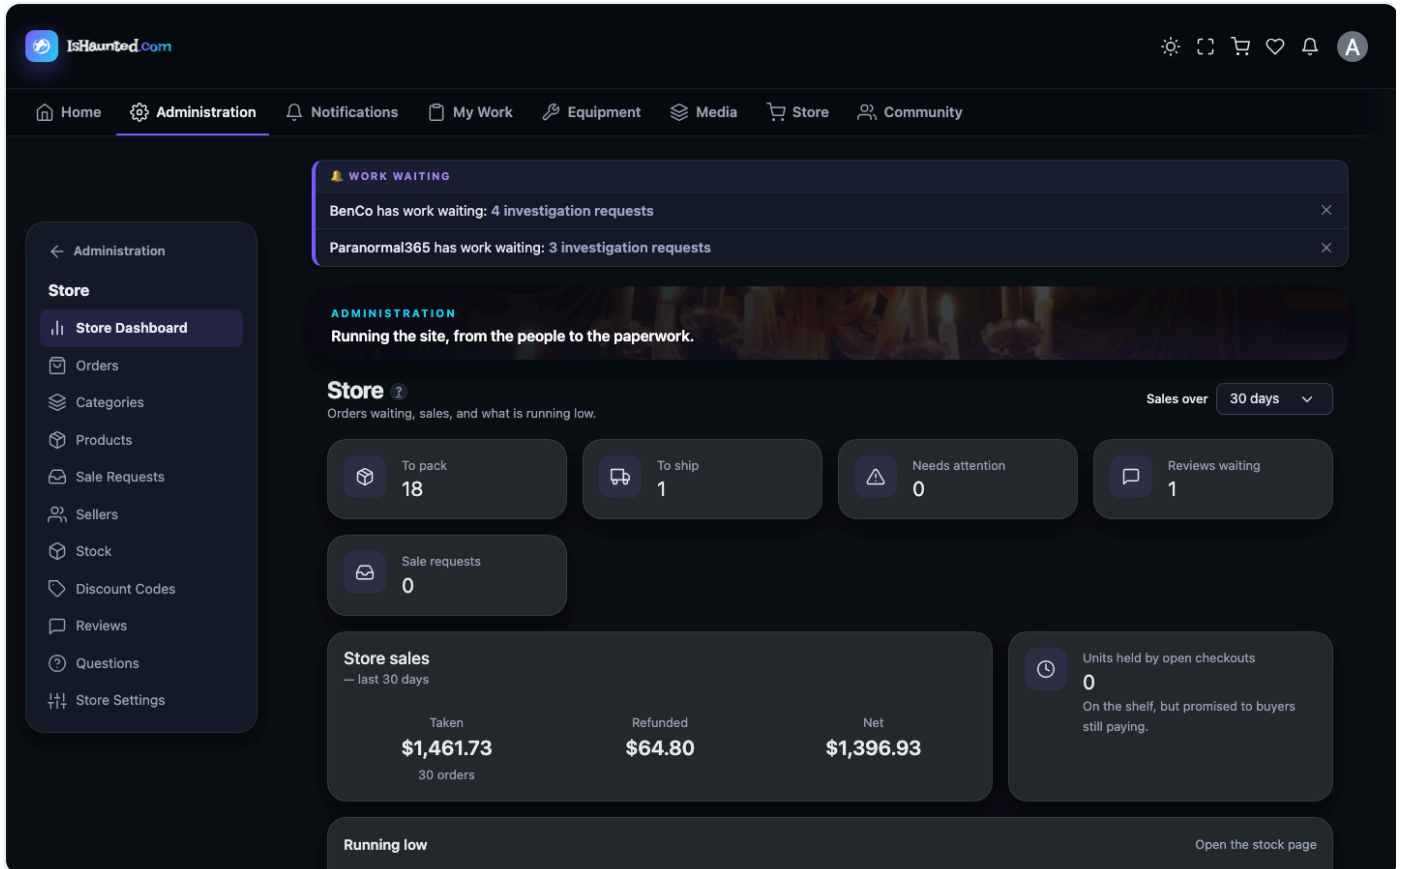

Listed a trespass at a closed hospital as a public ghost hunt.
