EVERYTHING IT DOES

ONE HOME FOR THE PARANORMAL

Everything the night needs, in one place.

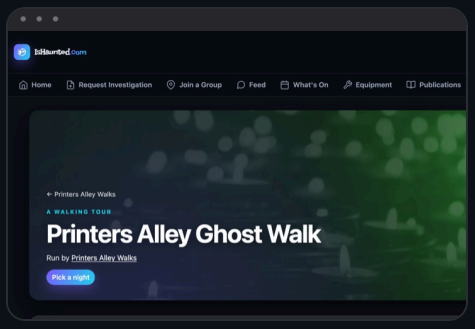

Explore haunted places. Run a group and work real cases. Find a voice in a recording, cut the clip, and send the client a report. Sell out a haunted weekend. One site – and the phone in your pocket is part of it.

Explore for nothing
The feed, a map of haunted places, and every tour and night out near you. No account needed to look.

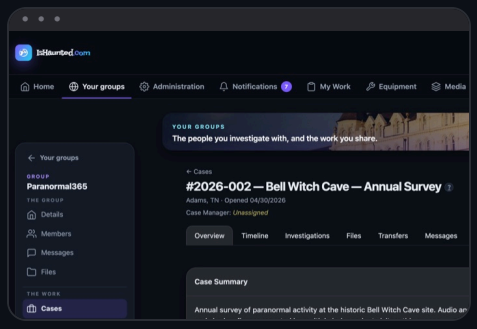

Investigate properly
Cases, evidence tools, roles that decide who sees a private home, and reports a client can read.

Fill the house
Ghost walks, venues and haunted weekends: bookings, passes, the door, and the money.

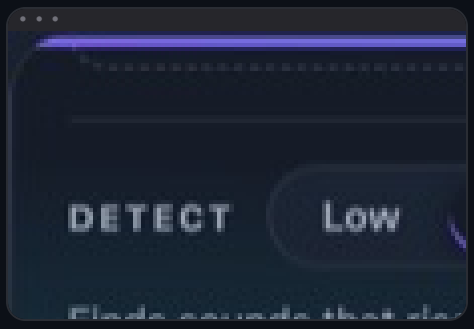

A GLIMPSE OF THE REAL THING

A night out, booked
Every ghost walk and haunted weekend near you, with the dates people can take.

A case, worked properly
The client's own words, the timeline, the evidence and one thread.

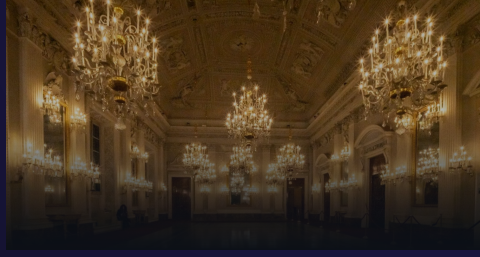

Voices under the noise
The EVP detector marks what it heard and you keep what is real.

to join, explore and post

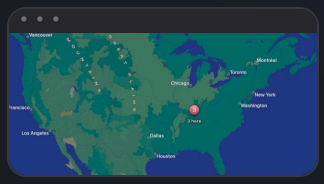

Twelve things it does. None bolted on.

The editors, the detector and the apps are part of the site rather than separate products — so a recording made in a dark hallway reaches a client's report without anybody emailing a file.

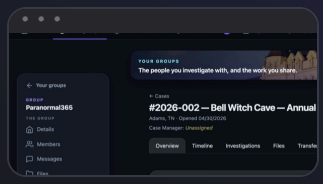

The feed

Follow places, groups and nights out. Polls, photos, links.

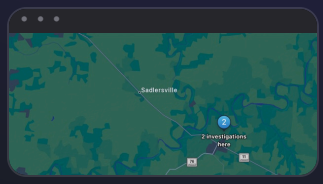

A map of haunted places

Every public place, what happened there, what is on near you.

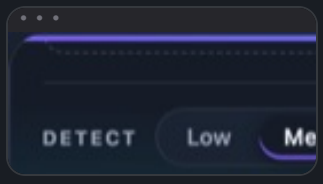

Cases and evidence

The client's words, the timeline, the files, one thread.

Investigations

Propose dates, take the roster, and put the visit on the map.

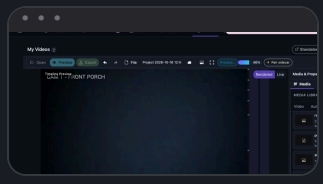

The EVP detector

Finds voices under the noise and hands you the candidates.

Audio tools

Spectrogram, filters, a noise gate, silence detection, clips.

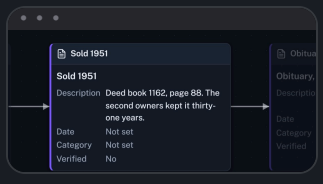

A video editor

Timeline, callouts, text, transitions and export — in the browser.

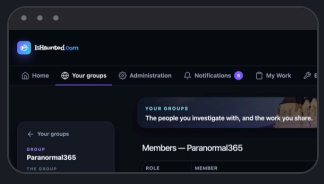

A photo editor

Crop, straighten and mark up a photo without leaving the case.

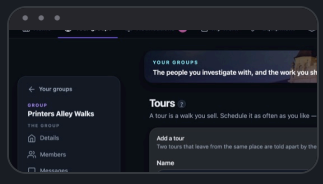

Research boards

Lay out a family tree or a deed trail, then present it full screen.

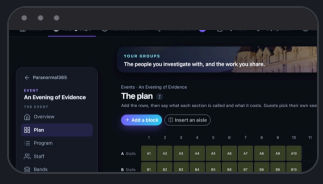

Your group

Members, roles, titles and duties — and who sees a private case.

Ghost walks and tours

A page per tour, dates people book, a door list for the guide.

Hosted events

Rooms or seats on a plan, and passes that open with no signal.

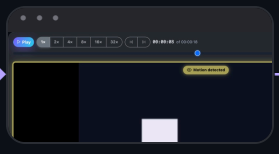

HOW THE PHONE AND THE WEBSITE ARE ONE THING

The same recording, start to finish — nothing exported, nothing uploaded by hand.

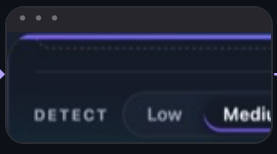

Record it in the field

The Paranormal Platform turns the phone into a meter and a recorder. No signal needed.

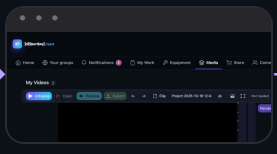

It lands on the case

The session uploads itself when there is signal again, onto the right case.

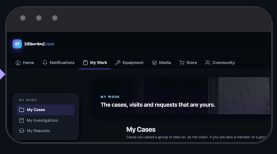

Scan it for voices

The EVP detector works the whole recording and marks what it heard.

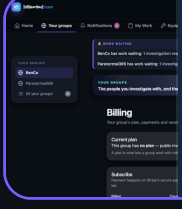

Cut the moment out

Keep the clip, caption it, and put it in a report or a publication.

The client reads it

They see their own case, the evidence you chose, and nothing you did not.

Free to explore. Pay only for what you run.

Enthusiasts: free, with the Paranormal Platform and 2 GB of your own files · Groups from $20 a month · Ghost walks $29 a month per tour route · Hosted events $99 each ($19.80 with a paid plan), however many nights · Investigations
